Product Description

99% Raw Cosmetic Palmitoyl Tripeptide 5 Peptide CAS 623172-56-5

This highly bioactive peptide penetrates deeply into the skin by enhancing the production of Raw Cosmetic Palmitoyl Tripeptide 5 Peptide. By stimulating Palmitoyl Tripeptide 5 Peptide synthesis, this complex helps to strengthen the skin and reduce the appearance of fine lines and wrinkles. It overcomes the effects of matrix metalloproteinases (MMP), which cause skin ageing.

Applications

This peptide complex has been found to stimulate collagen synthesis and visibly improve the appearance of any type of wrinkle. Palmitoyl Tripeptide 5 tightens and moisturises the skin and even reduces the appearance of stretch marks. In one clinical study, Palmitoyl Tripeptide 5 reduced the appearance of wrinkles by 350%. This is a great alternative to Palmitoyl Tripeptide 5 injections!
